

WATCHPAX video encoding guidelines

Here are very simple guidelines for video playback in WATCHPAX:

- 1a) Full HD (1920x1080) single video
- 1b) H.264* is the best choice *8-16 Mbit - Keyframe distance 30

- 2a) Full HD (1920x1080) dual videos
- 2b) Two MPEG2* is the best option *10-20Mbit - GOP 15
- 2c) One H.264 and one MPEG2 is the second best option

- 3a) HD (1280x720) multiple videos or videos with double frame rate, i.e. 50 or 60 fps
- 3b) MPEG2

- 4a) Video with Alpha Channel (Transparency)
- 4b) Quicktime Animation 32+bit (Millions+)
